

Vetonit PAB500

Saveto plaster accessories - angle beads

Uses

- Help the formation of corners and abutments which are resistant to chips, cracks and impact damage.
- Protect corners & edges
- Giving better shape for the corners and edges.

Product Description

Vetonit PAB500 is a pre-galvanized steel angle bead with extended metal wings. Vetonit PAB500 provides a sharp, straight aris that protects and reinforces vulnerable plaster edges. The expanded metal wings ensure Vetonit PAB500 is firmly embedded in the plaster.

Advantages

- Easy to apply.
- High impact resistance.
- Reduces the time taken in forming sharp corner joints, end stops and other details.

Standards Compliance

- ACI: 524R-08 (Building Code Requirements for Masonry Structures).

Usage Instructions

Application

Fix Vetonit PAB500 by using Premix Plaster S, Vetonit Render, or any suitable mechanical fixing at a maximum center spaces of 600mm.

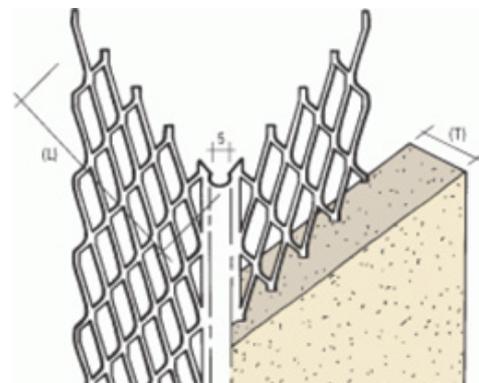

Vetonit PAB500 may be wire tied to the face of metal lathing backgrounds. Use tinsnips or shears to cut angle beads to the desired size.

When jointing angle beads use a dowel inserted in the nose to ensure continuity and alignment.

To get a sharp neat corner finish, avoid damaging the beads when troweling plaster or render.
